

## **POWER FACTOR CORRECTION MAINTENANCE ALL MAKES ALL MODELS**

Engineers Throughout the UK - Largest Independent Maintenance Division in UK

**OVER 96% OF PROBLEMS FIXED SAME DAY**

EnergyAce offer Power Factor Correction Maintenance on all makes and all models throughout the UK and operate the largest independent power factor correction maintenance division in the UK

EnergyAce offer a comprehensive switchgear service and power factor correction maintenance package for all your energy saving, power quality products and associated switchgear irrespective of manufacturer or location.

Once you have invested in your energy saving technology, protect it with a planned power factor correction maintenance program or switchgear maintenance scheme.

### **Specialised Maintenance Engineers Across The UK**

These products are somewhat specialised and offer a difficult challenge to general maintenance staff and contractors who may not be fully conversant with their operation and associated dangers.

## Avoid the Cost of Re-Visits

All EnergyAce engineers carry a vast array of different spare parts and will always try to fix your power factor correction problem before leaving your site to avoid the charges associated with a revisit to repair.

Over 96% of problems are fixed on the same day with no extra charges apart from the cost of the spare part during a planned power factor correction maintenance visit.

## Power Factor Correction Maintenance Scheme

A planned power factor correction maintenance scheme and switchgear maintenance scheme removes the responsibility of compliance from you the client, EnergyAce ensure your system is fully functional, saving you money and meets legislation.

## Checking The Power Factor Correction System is SAFE

Who in your organisation carries out checks to ensure the power factor correction systems are safe, functional and working for you?

Who in your organisation checks there are no reactive power charges or hidden penalties on your electricity bills due to non-functional power factor correction systems or associated systems?

Contact EnergyAce today to arrange a switchgear service or power factor correction maintenance visit and ensure your energy savings systems are safe, saving you money, reducing demand and assisting with compliance.

Let EnergyAce take the pain of compliance away with planned power factor correction maintenance and switchgear service.
