# Chamber Low Carbon Grant

## Chamber Low Carbon Grant

If you are an eligible, Lancashire based, small to medium sized enterprise looking to install equipment, or measures to improve your energy or resource efficiency, or perhaps thinking about installing on-site renewable energy generating equipment, the Chamber Low Carbon Programme could be in a position to help.

Chamber Low Carbon is a European, part funded, business support programme designed to help Lancashire businesses improve their energy efficiency and overall environmental performance, to help introduce onsite renewable energy and save you money.

### Typical projects funded

Installation of:

- LED lighting
- Solar Photo Voltaics
- Solar Thermal
- Biomass
- Anaerobic digestion
- Small hydro power
- Ground and Air Source Heat Pumps
- IR Heating
- Variable speed drives
- Voltage optimisation

This is not an exhaustive list
